Healthvision Announces Certification of Computerized Nursing Plan

DALLAS – December 9, 2009 – Healthvision has completed the certification process for its new Nursing Plan module with the *Ordre des Infirmières et Infirmiers du Québec*. The Nursing Plan (NP) module is integrated with the MediClinic Suite software and facilitates the completion and printing of the *Ministère de la Santé et des Services Sociaux du Québec* AH-602 form, a requirement since April 1, 2009 in Quebec, to be put on file of any patient requiring a specific clinical monitoring.

The *Ordre des Infirmières et Infirmiers du Québec* (OIIQ) certification process aims to ensure the compliance of a computerized NP to the nursing documentation standard in force since April 1, 2009. The certificate covers the current MediClinic (v4.1) version as well as the next version (v4.2) that is presently in pilot stage — to be delivered to health institutions in 2010. The list of certified applications, including MediClinic, can be found on the OIIQ website at: <http://www.oiiq.org/infirmieres/plan/informatisation.asp>.

Subject to the standard of nursing documentation, the Nursing Plan (AH-602 form) provides health stakeholders with a new tool for clinical documentation that is based on health problems and on a scalable monitoring of support while offering a new communications channel between stakeholders in the continuum of care and health services. Its automation and integration to the MediClinic Suite were therefore meaningful, thereby facilitating, on one hand, its completion and its maintenance by automation and suggestions of clinical terminology, and on the other hand, sharing it in electronic form.

The MediClinic Suite is a computerized patient record system integrating a query-results system (MediResult), an interdisciplinary plan for the short term (MediPlan), a plan for long-term care consistent with the SICHELD normative framework in Quebec (MediCheld), a clinical database (MediData), and a Web portal to health information (MediWeb).

About Healthvision

Healthvision is a leading provider of healthcare specific software and services. We provide innovative, cost-effective solutions enabling vital access to healthcare information anytime and anywhere, improving clinical and financial outcomes. Our solutions, powered by Cloverleaf® Integration Suite, are at work in thousands of facilities around the globe, including 40 percent of all large Integrated Delivery Networks, and 33 percent of U.S. hospitals.
